

# MudGuard™ v2 Microphone Shield

For microphone isolation in any recording environment, the **Auralex MudGuard v2** uses a new, proprietary convex design which diverts internal shell reflections, offering unsurpassed performance among all microphone shields.

- Convex Technology Redirects Internal Sound Energy Away from the Microphone
- Solid Shell Reduces External Noise While Filtering Unwanted Overtones
- Minimizes Excessive Room Ambiance and Off-Axis Sound
- Uses Auralex® Studiofoam® for Maximum Absorption Performance
- Mounts Easily to Most Microphone Stands

## MudGuard™ v2 Product Specifications:

|                   |                                |
|-------------------|--------------------------------|
| <b>Dimensions</b> | 16" Wide x 10" Deep x 14" Tall |
|-------------------|--------------------------------|

## The Benefits of Convex Technology:

| Convex,<br>Solid Shell                                                   | Concave,<br>Solid Shell                                           | Concave,<br>Perforated Shell                               |
|--------------------------------------------------------------------------|-------------------------------------------------------------------|------------------------------------------------------------|
|                                                                          |                                                                   |                                                            |
| ✓ Directs Acoustic Energy within the Mic Shield away from the Microphone | ✗ Focuses Acoustic Energy within the Mic Shield to the Microphone | ✓ Allows Acoustic Energy within the Mic Shield to Leave    |
| ✓ Blocks Acoustic Energy from Room                                       | ✓ Blocks Acoustic Energy from Room                                | ✗ Allows Acoustic Energy from Room to Reach the Microphone |
